

Games to stretch the mind

Rally Driver

VMN 4
NOPPECKE BATTERIES
KLIPPAN

Five Ways Software

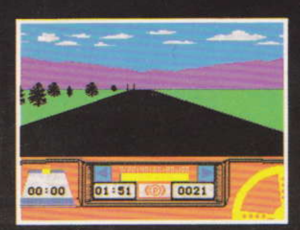

Drive as fast as you dare through superb 3-D landscapes. But plan ahead and watch out for dangerous junctions, slippery patches, pedestrians, and other hazards, or you'll crash.

Navigate yourself round the three courses using your map. Failure to check in with secret code at time controls incurs penalty points. Road information 'flashes' may require last minute changes.

Your decision-making is as critical as your driving skill if you are to get to the top of the leaderboard.

Key Features

* 3-D high speed graphics
* Complex 'real life' road systems where *you* choose the route!
* Dash board shows moving steering wheel, speedometer, digital clock, time taken, hand brake, road news 'flashes'
* Detailed map
* Varying weather conditions, day and night
* Three-stage rally, progressively more difficult
* Joystick option
